Not sure. They cut out the overlap area with High Pointe in an attempt to resolve the issue of common areas between the mines. Some of the PSS has been changed to PFO, and added more streams and smaller wetlands.

How many total acres is it now?

Give me a call so we can talk mines when you have a few. Need to talk to Wendy about upcoming stuff, plus what I will work on and time commitments. Also I see if I head down for some fieldwork if you don't mind, so I can take a look at the site, may need to look at Melissa's old project and it's mitigation.

PS Free water, nice idea.

Finish field verification last week. Should be getting revisions soon and will go look again.

So what's the deal with EPA drafting this rule and giving away water's?
